SUMMARY

I am a Software Engineer with 6+ years of proven experience in agile development and technical leadership. My track record includes successfully optimizing workflows and enhancing delivery quality on complex retail projects. I am recognized for my proactive approach in identifying and resolving technical and managerial challenges. I am now looking to apply my strategic insights from an MBA in Software Engineering to lead innovative and efficient development and demand management initiatives.

EXPERIENCE

Gazin Tech

Software Developer | Tech Lead — 08/2021 - Present

Gazin Technology Hub

- Served as a Tech Lead for the company's marketplace project, which included Node.js APIs, Kafka messaging, ReactJS, and Storybook on the front-end, all integrated within an NX monorepo and built on Clean Code and DDD principles.
- Successfully reorganized the team's workflow, reducing coordination issues and task loss, which led to a significant increase in the quantity, quality, and robustness of the team's deliveries.
- Contributed to a new version of the B2B e-commerce platform using NextJS and developed marketing campaign sites with their respective backoffice dashboards using RemixJS to enable more dynamic content delivery.
- Developed and implemented a biometric and document capture project for the credit analysis department using React, Vite, TypeScript, Tailwind, and facial recognition SDKs, addressing various business needs.
- Widely recognized for focusing on the end-user experience and aligning with business strategy by designing and building responsive, user-friendly, and attractive user interfaces.

Benner

Software Developer — 11/2019 - 08/2021

Brazilian national leader in healthcare solutions

- Worked on hospital-focused teams, maintaining a critical SaaS for clinics and hospitals used throughout the country for patient management. This involved working with legacy systems in Web Forms, as well as AngularJS and .NET MVC.
- Maintained procedures and other components with high quality, always in alignment with business rules.
- Implemented major features requested by clients, contributing to the evolution of the product.

Benner

Intern — 06/2019 - 10/2019

Brazilian national leader in healthcare solutions

- Trained in .NET and various other technologies and skills
- Developed a school management system using open source technology and replicated it using company's proprietary technology.
